G2 Electrical Wholesale Ltd

AWARD-WINNING INDEPENDENT WHOLESALER

Introducing G2 Electrical Wholesale, an award-winning independent wholesaler.

Running a well-oiled operation, every member of the G2 team are industry product experts and highly responsive to your requirements.

Whether you need manufacturer-specified components, reliable warranted products or suitability advice, you can rely on G2's knowledge to guide you.

When you need guidance about LEDs, energy efficient products, or a fire alarm or lighting design, view our integrated showroom demo kit, ask questions or request an on-site survey.

Even if you're not a tradesperson, facilities manager or part of a maintenance team, you can rest assured we have bags of experience in working with sole traders, small local retail businesses and large organisations across all sectors.

Contact the G2 team today.

A REAL TEAM YOU CAN TRUST

You will be well aware of today's fast-paced hyper-connected world where sometimes online ordering and pages of product descriptions just isn't what you're looking for. It's a waste of time and there's always a risk of choosing the wrong product with no one to turn to for advice. This is where G2 can help.

When you become a G2 Electrical customer you gain access to industry experts, wholesale only products and local free events that will improve your knowledge and help to grow your customer base.

As sourcing specialists we take the hassle of researching the ideal product from you and weigh up the pros and cons so you only have to review the details that matter.

Take advantage of flexible delivery, regular breakfast mornings and manufacturer events, large shelf stocks and high-tech demo units.

NOT ALL LED LIGHTING IS THE SAME

Implementing LED lighting will, without question, add money to your company's bottom line.

The technology has advanced significantly over the past few years although there are still inferior products on the market. With a tailored G2 Electrical feasibility study you will discover the initial outlay, payback period, accurate cost savings and improved energy efficiencies.

- **5-year warranty - some options insured**
- **Longer lighting lifespan**
- **Zero maintenance costs**
- **£££s in savings of up to 65-90%**
- **Tier 1 LED lighting to ensure low fail rates**
- **Up to 80% reduction in energy consumption**

You can also take full advantage of a funded solution to ease the cost with zero catch.

A full Relux lighting design (to give accurate projections and light fitting performance illustrations) will back up each proposal offered.

THE REAL BENEFITS OF LED LIGHTING

An LED survey will review the current running hours within your premises, outline the cost of replacement lighting and calculate the fitting life expectancy to provide accurate energy and money savings.

Pop down to the showroom to view the latest in LED lighting and automated technology.

- LED lighting colour temperature
- LED lighting levels
- Audio-visual lighting
- Home security and automation

Your customers are welcome to join you for a demonstration, ask questions and indulge in a free cuppa and biscuit.

CREATING A COMFORTABLE ENVIRONMENT

Maintaining an ambient temperature and having the option to crank up the heat or cool the atmosphere when required is a necessity in modern working and living.

Quality heating, ventilation and air conditioning (HVAC) units include variable performance and offer extended warranties.

Automated technology and building management systems enable easy monitoring and servicing of HVAC systems. Businesses and homes can run efficiently without the extra burden of costly maintenance and unreliable equipment.

Choose from a range of heating and cooling equipment, fans, circulators, thermostats and dryers.

HEATING COOLING & ENERGY PROVISION

The recent Lot20 regulation of the ECODESIGN Directive is designed to tackle inefficient electrical heating appliances and technologies to reduce energy use and lower carbon footprint.

Our branch carries in stock various radiators, towel rails, water heaters, storage and panel heaters, fans and dryers, underfloor heating options, demisters, thermostats and controls for complete comfort, ease and warmth.

Pop down to the branch to discuss the options and to learn more about what Lot20 does and doesn't affect.

KEEP YOUR ESSENTIALS CLOSE AT HAND

It's the little bits and bobs that are the tradesperson's best friend on site and in an emergency.

Whatever you require to finish the job from clips and clamps to nails, nuts and rods, you'll find a huge range immediately available on the shelf at G2 Electrical.

Stock up on batteries, tapes, screws and plugs and rest assured that you will be ready to confront any project ahead.

Tackle all weather and terrain with quality PPE equipment such as hard hats, gloves, torches, site lights and first aid kits. Choose from a full range of clothing and safety footwear styles, colours and sizes, available in-stock or on a next day delivery. Embroidery service also available.

ALL VARIETIES AND SIZES

Cable products are available in full drums and offcuts to include armoured, twin and earth, coaxial, telephone, XLPE and PVC cable options.

Flexible Tails Kits are available as two and three metre options in blue, brown and green/yellow cable.

All cable is available in stock at the branch or on same-day delivery. We provide a valuable sourcing service for specialised cable such as control cable and instrumentation cable.

Full specifications and delivery options will be provided along with the best deal based on quantities required.

Find out more by calling **01543 273 840** or email us at **sales@g2electrical.co.uk**

CONTROL GEAR AND DISTRIBUTION

Quality control gear includes control stations, emergency buttons, enclosed stop and start buttons, industrial contactors and relays, modular timers and contactors, plug-in relays and bases, terminals and din rail accessories.

Reliable distribution boards held in stock include a range of ABB three phase boards, both Type A and Type B varieties, with the full range of MCB and RCBO.

Other distribution boards manufactured by specific suppliers are available on a next day delivery service.

CABLE MANAGEMENT

Cable management products include everything from flexible conduit, perimeter trunking, channelling systems and metal framing to cable trays, steel wire, catenary wire and baskets.

Additional cable management accessories include adaptable boxes and floor socket boxes from a range of brands held in stock or ordered on a same day delivery service.

Find out more by calling **01543 273 840** or email us at **sales@g2electrical.co.uk**

KEEPING CUSTOMERS AND FAMILIES SAFE

Fire and security risks are always present but so are many effective solutions to guard against potential threats and disasters.

Reliable smoke and carbon monoxide detectors are essential to deter hazardous substances and CCTV, security lighting, intruder alarms and door entry units help to protect people and assets.

FIRE ALARM, DISABLED REFUGE & NURSE CALL SYSTEMS

- Addressable systems
- Two-wire systems
- Conventional systems
- Wireless temporary systems

Take advantage of our free emergency lighting and alarm design service and discover more about intelligent automated technology.

SAFEGUARDING THE PASSAGE TO SAFETY

Testing emergency lighting can be a costly exercise and an inconvenience, especially if you operate a venue open to the public.

Relying on a tried and tested emergency lighting solution that guarantees you are compliant with minimal fuss is what keeps everyone safe. Essential fire and emergency accessories include fire extinguishers, battery charges and detectors.

MAINS AND EMERGENCY LIGHTING

- Energy saving LED luminaries
- Addressable and digital self-test systems
- Emergency conversion service
- Self-contained luminaries
- Central systems
- IET wiring regulations and testing books

LIVE AND WORK ON DEMAND

Technology has enabled homes and businesses to be interconnected by uniting lighting, heating, entertainment, security and access.

Smart technology and home automation can create ambient light and heat settings at the touch of a button. This hugely advanced concept of remote control can keep assets and people safe and secure by using a series of commands to operate all aspects of electronic security devices and access control.

Home automation adds functionality and convenience to day-to-day processes from turning on lights and heating, opening and closing blinds to managing music and television devices with voice control.

Talk to us about home automation technology and pop into the branch to view our state-of-the-art automated showroom facilities where all options can be demonstrated.

FLAUNT FIXTURES AND FITTINGS

Wiring accessories can make a huge difference to the décor of a room.

Taking care to match the function of a room, its intended visitors and the aesthetics of colour and furnishings can really dress it up or down. Domestic, industrial and commercial accessories from sockets, switches and fuses to junction boxes and ceiling lamp holders are available off the shelf and as same day delivery.

Choose from a range of decorative finishes such as brushed stainless steel, antique brass or modern USB combinations. Accessories are available as raised or flat plates and are fully compliant with all safety regulations.

The latest EV charging points, dimming modules and colour change accessories are also available.
